

I respectfully request that the FCC (Federal Communications Commission) reject NAB's (National Association of Broadcasters) petition 04-160. I have been a long time user of XM Satellite Radio service. I am a Over The Road truck driver and rely heavily on their ability to bring me the latest news, weather, and traffic reports for areas that I travel in. The areas I travel in to bring consumer goods to the public is all 48 contiguous states. Before Satellite radio I had to rely on AM/FM channels which most of the time I could not receive adequately enough to serve my needs. I believe that what the NAB is trying to do is a violation of XM Satellite Radios' 1st amendment rights. XM Radio is vital to the my business with the service they supply me. I again urge the FCC to reject NAB's petition. Thank you.
